

POST TEST FOR PBP MODULE 7

- 1) True or False: It is not necessary to consider IM testing data when formulating a treatment plan, only use discipline specific testing.**
- 2) True or False: The key to success with IM training is to always have a plan laid out for a student to participate in and stick to that plan throughout the training session.**
- 3) True or False: It is not important to increase repetitions, just as long as your IM student is enjoying their sessions with you.**
- 4) True or False: You do not need to own expensive therapeutic equipment to modify IM interventions.**
- 5) True or False: It is important to consider preparing short articles and case studies to support your interventions with Interactive Metronome Systems and to keep up with current research.**
