

Beyond the Fifth Sense: The Effectiveness of IM on SPD

Course Description:

Children with sensory processing disorders often have difficulty with regulation and modulation of sensory input which impacts behavior, attention, social interaction, body awareness, motor planning, fine and gross motor coordination, as well as new learning. Sensory processing disorders are often seen in children with developmental delays, Autism Spectrum Disorder, Asperger's Syndrome as well as in typically developing children. The use of Interactive Metronome can significantly improve the sensory integration of these children and improve their quality of living. This course will educate participants on the sensory systems (visual, auditory, tactile, olfactory, vestibular, and proprioceptive) and how to coordinate and adapt sensory strategies with the use of IM. This course will also focus on the case study of one child with Autism who has undergone treatment of IM using sensory strategies and how his fine motor, gross motor, social interaction, and overall sensory processing as improved due to IM treatment. ***Contact hours are offered pending successful completion of a written exam at the end of the course.**

Target Audience:

This course welcomes the following professionals who have completed the Interactive Metronome Certification Course.

- Speech and Language Pathologist
- Speech and Language Pathology Asst
- Audiologist
- Occupational Therapist
- Certified Occupational Therapy Asst
- Physical Therapist
- Physical Therapy Asst
- Athletic Trainer
- Licensed Medical, Rehabilitation or Mental Health Professional
- Music Therapist

Instructional Level:

Advanced

Learning Outcomes:

Upon completion of this course, participants will be able to:

- Identify the potential benefits of Interactive Metronome (IM) for the treatment of sensory processing disorders.
- Implement sensory support-based IM treatment strategies for children with sensory processing disorders.

***Note: This course covers information that pertains to licensed therapists and therapy assistants. COTA and PTA professionals must practice IM under the supervision of a licensed OT or PT.**

Specific Learning Outcomes for Speech-Language Pathologists & Audiologists:

- Identify the potential benefits of Interactive Metronome (IM) for the treatment of communication and pragmatic language skills in children with sensory processing disorders.
- Implement sensory support-based IM treatment strategies for children with sensory processing disorders to enhance speech therapy outcomes.

***Note: This course covers information that pertains to licensed therapists and therapy assistants. SLPA professionals must practice IM under the supervision of a licensed SLP.**

Instructor:

Jenna M. Inducci MS, OTR/L

Jenna Inducci received a Bachelor's degree in 2006 from Hunter College, City University of New York. In 2008 she continued on to receive her Master's degree in Occupational Therapy from Thomas Jefferson University. Jenna received a specialization in Sensory Integration Therapy. Her research thesis was performed on the effectiveness of the Interactive Metronome program on a child with Autism. Jenna is an occupational therapist for Children's Specialized Hospital in

Hamilton, New Jersey as well as in her own private practice. In her private her she specializes in treatment of children with developmental delays, sensory processing disorders, and children on the autistic spectrum. She also has extensive experience in therapy programs such as Fast ForWord, Neuro-developmental Techniques, Handwriting Without Tears, and Lexia. Jenna is certified in Rhythm Entrainment Intervention and The Listening Program. She has been a provider of Interactive Metronome since 2007 and implements the program in her own private practice to help improve the quality of life in her clients whenever possible. Jenna looks forward to helping other clinicians utilize the best practice of IM therapy.
