

"In today's tough economic times and with cuts in insurance coverage for therapy we are not always provided with enough time to work with our clients and give them the weeks/months of treatment they often need. Therefore as therapists we need to look for tools that will help our clients achieve their best outcomes in the shortest period of time. I have been using Interactive Metronome® for almost ten years and have witnessed statistically significant progress in just a few short weeks of therapy. I believe Interactive Metronome® should be the first step in a therapeutic approach to improve the emotional, cognitive, motor, academic and sensory deficits of your clients. It is the only program of it's kind that delivers results so quickly and is so easy in it's application. It is suitable for adults and children regardless of their disabilities. It should be a part of every therapist's practice!"
