

Combining Speech and Motor Milestones During IM

Course Description:

The purpose of this course is to teach IM providers to incorporate gross and fine motor movements into IM training sessions to facilitate vocabulary development. Developmental milestones, neuroplasticity, and cognitive development will be discussed within the context of learning to address a wide variety of diagnoses. Activities will be demonstrated and can be modified to meet an individual child's needs.

Target Audience:

- Speech and Language Pathologist
- Speech and Language Pathology Asst
- Audiologist
- Occupational Therapist
- Certified Occupational Therapy Asst
- Physical Therapist
- Physical Therapy Asst
- Athletic Trainer
- Licensed Medical, Rehabilitation or Mental Health Professional
- Music Therapist
- Educator

Learning Outcomes:

Upon completion of this course, participants will be able to:

- Participant will identify speech and motor developmental milestones which co-occur to assist with the development of IM activities to maximize functional improvement in developmental skills;
- Participant will implement a wide variety of gross and fine motor activities during IM training with the goal of facilitating cognitive, communicative and motor skills.

***Note: This course covers information that pertains to licensed therapists and therapy assistants. COTA and PTA professionals must practice IM under the supervision of a licensed OT or PT.**

Specific Learning Outcomes for Speech-Language Pathologists & Audiologists:

- Participant will identify speech, language and motor developmental milestones which co-occur to assist with the development of IM activities to facilitate speech and language development;
- Participant will implement a wide variety of gross and fine motor activities during IM training with the goal of facilitating speech and language.

***Note: This course covers information that pertains to licensed therapists and therapy assistants. SLPA professionals must practice IM under the supervision of a licensed SLP.**
